CONTRIBUTION OF EXHIBITIONS IN IMPROVEMENT OF TRADE AND TECHNOLOGY IN GRAIN SECTOR IN INDIA

➡ Radeecal Communications is pioneers in the industry where corporate level of exhibitions is the concern. In the history of exhibitions after the successful story of Agri Asia (An International Exhibition on Agriculture Technology) we are all set to introduce new wing of subject Grainmach Asia (An international Exhibition on Grain and Grain Milling technology).

A Grain Technology advancement oriented exhibition and conference is to be held on 20, 21 & 22 September 2024 at Helipad Exhibition Centre, Gandhinagar, Gujarat.

➡ Food grain production covers the dominant part of the cropped area (65%) in Indian agriculture.

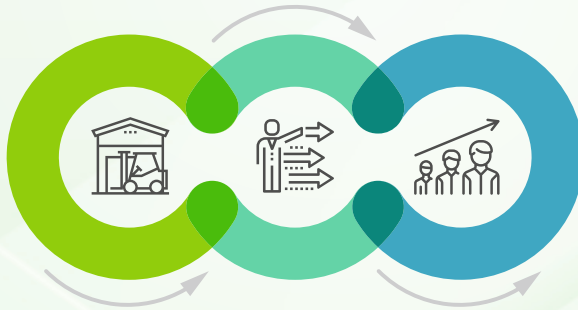

India is the world's largest producer of millets and second-largest producer of wheat, rice, and pulses.

The highest food grain production of 259.32 million tonnes was recorded in 2011–12.

The cereals other than rice and wheat contributed 1 kg per person per month in rural India and 0.8 kg per person per month in urban India in 2011–12.

The consumption of all food grains per person in the rural areas is projected to decline from 15.3 kg per month in 2000 to 13.8 kg per month by 2050 and only slightly decrease from 11.8 to 11.6 kg per month in the urban areas.

WHY IN GUJARAT?

Situated on the western coast of India, Gujarat has long been considered one of the most progressive states of India on both the industrial and agricultural fronts. Imbued with a proactive, visionary outlook, the government of Gujarat has catalyzed development in various spheres, thus propelling the state towards progress.

Gujarat is endowed with abundant natural resources in terms of fertile land, river systems, good soil and climatic conditions in many parts of the state and good support in terms of input industries and, most importantly, enterprising people and technical talent.

Keeping in view the above facts about Gujarat, several opportunities have been scanned and identified and which offers commercial potential for attracting industrial investors from within India or Overseas.

Gujarat is the main producer of tobacco, cotton, and groundnuts in India. Other major crops produced are Rice, Wheat, Jowar, Bajra, Maize, Tur, and Gram.
